

Creating silhouette portraits

Method 3

Cutting out profile

The children will need access to a camera and space to take photographs of each other against a blank background.

- 1 Split into groups and take photographs of each other in profile on a blank background.
- 2 Print out the photographs and carefully cut around the picture.
- 3 Place the cut-out photograph onto a piece of black paper and trace around the photograph.
- 4 Cut out the black image and stick onto a white piece of paper to create a silhouette portrait.
