

Julia Carter Preston

Ceramics

Julia Carter Preston is a significant artist in Bluecoat's history. She was a popular ceramicist and daughter of Edward Carter Preston, a founding member of the Sandon Studios Society.

Her distinctive ceramics – including bowls, plates, cups and plaques – were created using the *s'graffito* technique, and featured words, patterns, colour and images from nature. Her studio overlooked Bluecoat's garden and she enjoyed working outside in the summer.

This work was shown in the *In the Peaceful Dome* exhibition at Bluecoat in 2017.
